Education

UNIVERSITY OF NOTTINGHAM MALAYSIA

Bachelor of Science with Honours of Computer Science, First Class Honours

September, 2022 – June, 2025

Relevant Modules: Programming Paradigms, Databases and Interfaces, Fundamentals of Artificial Intelligence

Relevant Coursework:

Team Leader and Software Developer, Car Rental Website

- Directed a team of 4 in the comprehensive development of a real-time car rental website.
- Spearheaded the formulation and refinement of the website's frontend, backend, and database architecture.
- Achieved deep understanding of key technologies, including:
 - Frontend: Proficient in HTML, CSS, and JavaScript for creating intuitive user interface.
 - Backend: Developed robust backend functionality using PHP.
 - Database: Designed, implemented, and managed the database using SQL and PHPMyAdmin.
- Attained first-class honours grade for the coursework.

UNIVERSITY OF NOTTINGHAM MALAYSIA

Foundation in Science, First Class Honours

September, 2021 – July, 2022

Relevant Modules: Fundamentals of Programming, Internet Programming

Relevant Coursework:

Software Developer, Morse Code Program Projects

- Designed and led the development of two interactive Morse code programs using C and MATLAB.
- Implemented user-friendly features, including audio playback of Morse code signals in MATLAB.
- Ensured robust error-handling by incorporating input validation and informative warning or error messages.
- Developed bidirectional functionality, enabling conversion of text to Morse code and Morse code to text.
- Achieved first-class honours for both projects, demonstrating strong technical, creativity and problem-solving skills.

SEKOLAH MENENGAH KEBANGSAAN INFANT JESUS CONVENT

9A+ in Sijil Pelajaran Malaysia (SPM)

January, 2016 – March, 2021

Experience

UNIVERSITY OF NOTTINGHAM MALAYSIA

Remote

Student Intern | Full Stack Developer | Project Lead

June, 2023 – September, 2023

- Led a collaborative effort with a team of 2 to create a unique website featuring Cartoon, Watercolour and Impressionism filters.
- Acquired expertise in image processing techniques including K-means clustering, and Canny edge detector.
- Successfully implemented Cartoon and Watercolour filters and incorporated watermarks into the filtered image using Python libraries such as OpenCV, Pillow, ImageDraw and NumPy.
- Designed the website's interface and developed both frontend and backend components using HTML, CSS, JavaScript, Fetch API, and Flask to enable users to apply the filters.
- Optimised image loading time by an impressive 66.67% through the elimination of unnecessary operations and integration of asynchronous HTTP request using the Fetch API.

CHUA SOON HUP

On site
